Dear Sirs and Madams, I am a proud XM subscriber who respectfully requests that you reject the NAB's petition 04-160. NAB should not dictate what I can hear on XM, a paid service. If NAB wants to put pressure and exercise influence on AM or FM stations, that's their prerogative... but not on a new technology such as satellite radio. I enjoy the traffic and weather reports offered by XM, which are 1000% better than the reports on AM/FM stations. Perhaps NAB should listen to AM and FM prior to interfering with XM...
Thanks for your attention.
